

ABSTRACT OF THE DISCLOSURE

A protective grille for car radiator is disclosed. The protective grille has a main frame body having a hollow section forming into a side rim edge. A plurality of support rods, corresponding to the side rim edge, are linked and
5 support the main frame body, and corresponding to the hollow section a metallic net-like protective grille is mounted. On the protective grille, corresponding to the side rim edge of the metallic net-like protective grille, is provided with a folded edge. The hollow section is mounted with the protective grille and a mounting belt surrounds the net body, the supportive
10 rods, or an engaging grip is used to position the folded side and the main frame body. Thus, the protective grille for car radiator can be easily mounted.
